

The figure is a 2D plot showing the projected positions of stars in two clusters, 08G15 (blue) and 16G15 (red). The plot includes a central black circle representing the primary black hole. The stars are arranged in two main loops, one blue and one red, with various labeled points. A large arc on the left and a small arc on the right represent the boundaries of the clusters. A diagonal line of black dots is visible in the bottom right corner.
