COBE

COBE DIRBE CALIBRATED INDIVIDUAL OBSERVATIONS
COBE DIRBE CALIBRATED ANNUAL FILE

89-089A-02I
89-089A-02J

These data sets consist of 5 8-mm tapes that were created on a VAX system. The 26 KD Compact disks (CD-R's) were created on the PC to back up the original tapes. There is one 4-mm tape created as a back up to data set 89-089A-02J. The 8-mm, 4-mm, and the CD's are multifiled, written in FITS format.

The D and KD numbers and the time spans are as follows:

DD#	KD & DC#	DD Files	KD & DC FILES	Time Span

The DCAF files contain the same data as the Weekly Sky Maps but are organized differently. This product gives a pixel-by-pixel view of the intensity variations seen as a function of time, collecting all the weekly-averaged intensities measured at a given pixel into a single file.
Those who wish to study or model time-variable signals, such as the zodiacal light, will find this organization convenient. There are 6 DCAF data files, one for each face of the COBE Sky Cube, and each data file is accompanied by a DCAF Pixel Index file, which is designed to facilitate data retrieval. The files are FITS binary tables. A typical DCAF data file is ~200 MB in size.

DIRBE Calibrated Individual Obs

Prospective analysts are urged to respond to the NASA Research Announcement for archival research opportunities under the Astrophysics Data Program. Investigators whose proposals are approved may use the COBE Guest Investigator Facility and receive personal assistance from colleagues who possess detailed knowledge of the DIRBE instrument. Others may use the Guest Investigator Facility as resources permit.

See the DIRBE Explanatory Supplement for detailed information about the data produts. The Explanatory Supplement is available on line at http://www.gsfc.nasa.gov/astro/cobe/dirbe_exsup.html
