Tests performed on 2004/12/01 using CXFORM v0.6

Absolute differences: ABS((SSCWeb result) - (CXFORM result))

Percent differences: ABS(100.0 - ((SSCWeb result)/(CXFORM result))\*100.0)

Averages taken from approx 40000 data points (position in Re) over the course of the specified year.  
Source coordinate system was taken to be GSE.
